Projects

EduBridge(E-Learning Platform) — May 2026 - Jun 2026

- Built EduBridge, an online learning platform where students use an AI tutor, practice speaking in multiple languages, complete quizzes, and earn course certificates.
- Developed an admin dashboard for educators to create and manage quizzes, review and approve student certificates, send announcements, and track platform activity through activity logs.
- Designed a secure quiz system that grades answers on the server, hides correct answers from students, and delivers instant, fair results while preventing tampering.
- Created a certificate approval workflow where certificates are only issued after admin review, with real-time status updates and automated email notifications to students.
- Improved platform security and reliability by enforcing user permissions, protecting student data, logging admin actions, and maintaining up-to-date software dependencies.
